

OPTI-VAC[™]

Because Every Drop Counts.

Animal Science Products Launches Opti-Vac[™], the newest addition to their array of vaccine stabilizers.

Friday, February 20, 2009

Nacogdoches, Texas- Animal Science Products Inc., a leading privately-owned micronutrient premix blender, feed additive distributor and packaged goods manufacturer, proudly announces the release of Opti-Vac.

Opti-Vac has been designed to replace the ordinary sterile diluents used for poultry eye drop vaccine applications. Opti-Vac is the choice for eye drop vaccination programs for two primary reasons; it provides the optimum pH for vaccine survival and it creates an isotonic environment to ensure protection of the vaccine titer. Modern vaccines and the performance that producers demand are too important to compromise. Opti-Vac eye drop stabilizer works with vaccines, stabilizing and protecting them to optimize the efficacy of each dose delivered.

Opti-Vac stabilizer is available for purchase today both domestically and internationally. To learn more, please visit www.asp-inc.com or contact your local distributor.

Animal Science Products, Inc. is a family owned and operated business that was founded in 1985 to service all facets of the feed and food animal production industry. The firm produces and distributes a full array of high-quality feed additives, micro ingredients and premixes for all species. Animal Science Products also serves the livestock, poultry, and companion animal markets with nutritional and health-related packaged goods. The company currently has sales in twenty three states and twenty five countries.
