AMPROL 9.6% Oral Solution is intended as an aid in the treatment of coccidiosis in growing chickens, turkeys and laying hens. It is supplied as a water-soluble oral solution.

Active drug ingredient: Amprolium - 9.6% Carrier and/or diluent: Drinking water

Packaging: Distinctively labeled 2 gallon

containers

LEVELS AND ALLOWABLE CLAIMS

USE DIRECTIONS AND DOSAGE

As soon as coccidiosis is diagnosed, medicate the drinking water with AMPROL 9.6% Solution at the 0.012% level and continue for three to five days. In severe outbreaks a 0.024% amprolium level should be used. It is recommended to continue amprolium at a 0.006% level for an additional one to two weeks. Use as the sole source of amprolium. No other source of drinking water should be available to the birds during treatment.

CAUTION

If no improvement is noted within three days, have the diagnosis reconfirmed and follow the instructions of your veterinarian or poultry pathologist. Losses may result from intercurrent disease or other conditions affecting drug intake which can contribute to the virulence of coccidiosis under field conditions.

FDA STATUS

No Form FDA 1900 required for use of this product.

STABILITY

AMPROL 9.6% solution is stable for five years at time of manufacture. Benzoic Acid 0.1% added as preservative. Keep above 41°F (5°C).

Stock solutions for proportioners may be stored in a clean, closed, labeled container for up to three days.

Certain coccidial strains have appeared that are not sensitive to amprolium. The use of an alternate strain sensitive anticoccidial agent is recommended in these cases.

Keep this and all drugs out of the reach of children.

To prepare 50 gallons of medicated water:

Dosage Level	Mixing Directions
0.024%	Add one pint (16 fluid ounces) of 9.6% Solution AMPROL to about five gallons of water in a 50-gallon medication barrel. Stir, then add water to the 50 gallon mark. Stir thoroughly.
0.012%	Follow same directions as above but use $1/2$ pint (8 fluid ounces) of 9.6% Solution AMPROL.
0.006%	Follow same directions as above but use 4 fluid ounces of 9.6% Solution AMPROL.
	Note: Make drinking water fresh daily.

For automatic water proportioners that meter 1 fluid ounce of stock solution per gallon of drinking water:

Dosage Level	9.6% Solution AMPROL
Dobuge Level	per gallon of stock solution

0.024% 41 fluid ounces0.012% 20.5 fluid ounces0.006% 10.25 fluid ounces

Note: Stock solutions for proportioners may be stored in a clean, closed, labeled container for up to three days.
