### Feed Label Information:

When adding FEED UREA 46% to feeds, a minimum percentage of crude protein and a maximum percentage of equivalent crude protein from non-protein nitrogen (NPN) should appear as part of the guaranteed analysis on the feed label. Urea should be added to the list of ingredients. Feed Urea 46% is "Generally Recognized as Safe" by the American Association of Feed Control Officials.

### CAUTION: USE AS DIRECTED:

Use only as a source of non-protein nitrogen in commercial feeds for ruminant animals (cattle, sheep and goats) as a source of equivalent crude protein.
