

VAC-PAC PLUS[®]

FARM-PAC

NEW GENERATION WATER STABILIZER WITH DYE

www.asp-inc.com

Specification Sheet

INDICATIONS

Vac-Pac Plus[®] new generation stabilizer aids in the administration of vaccines for poultry and livestock. It is especially designed to prolong the viability and improve the effectiveness of reconstituted and diluted vaccines.

DIRECTIONS FOR USE

Dissolve 1 gram of Vac-Pac Plus[®] into each 10 liters of drinking water (100 gram Jar stabilizes 1000 Liters of water). Uniform distribution of the blue dye in the water assures the stabilizer is thoroughly mixed, and the stabilized solution is immediately safe for use.

INGREDIENTS

Water Stabilizing Compounds and Disodium Salt of ethyl [4-[p-[ethyl (m-sulfobenzyl) amino]-alpha-(o-sulfophenyl) benzylidene]-2,5-cyclohexadiene-1-ylidene], m-sulfobenzyl, p-sulfobenzyl, and o-sulfobenzyl ammonium hydroxide (E-133/FD&C blue 1).

WARNING

Keep out of reach of children

Not for human consumption

PACKAGING

100 gram Jars
40 Jars per Case
100 Cases per Pallet

ADVANTAGES

- More concentrated formula means added convenience and less handling
- Faster wetting and improved solubility results in less time spent mixing
- Activates immediately to reduce the harmful effects of oxidizing sanitizers in the tap water, no waiting required
- Buffers water to more ideal pH
- Improves tonicity and electrolyte balance
- Blue dye provides visual assurance that the stabilizer has been added and is properly mixed. It marks the progress of the water as it fills the drinking line.
- Specially formulated to eliminate ingredients of animal origin
- Will not clog drinkers
