

Gel-Pac[®]

Gel-Pac[®] new generation gel delivery system with stabilizer aids in the administration of gel-delivered vaccines, probiotics, and nutritional ingredients for poultry. It is especially designed to prolong the viability and improve the effectiveness of reconstituted and diluted vaccines and probiotics in a gel that is convenient to prepare and easy for birds to consume.

ADVANTAGES

- Stable gel ensures uniform suspension
 - Perfect for insoluble ingredients
- Individual gel drops are easily consumed
 - Will not soak feathers
 - Readily visible to the birds
- Ideal for use in gel delivery systems
