

Amprol® 128

(amprolium)

09709

PRODUCT DESCRIPTION

AMPROL 128 is a 20% soluble powder intended for use in the treatment of coccidiosis in growing chickens, turkeys and laying hens. It is supplied as a premeasured 20% soluble powder for automatic water proportioners.

Active drug ingredient: Amprolium - 20%
Carrier and/or diluent: Drinking water
Packaging: Distinctively printed foil packets

LEVELS AND ALLOWABLE CLAIMS

USE DIRECTIONS AND DOSAGE

As soon as coccidiosis is diagnosed, medicate the drinking water with AMPROL 20% Powder at the 0.012% level and continue for three to five days. In severe outbreaks a 0.024% amprolium level should be used.

It is recommended to continue AMPROL Soluble Powder at a 0.006% level for an additional one to two weeks.

Use as the sole source of amprolium. No other source of drinking water should be available to the birds during treatment.

CAUTION

If no improvement is noted within three days, have the diagnosis reconfirmed and follow the instructions of your veterinarian or poultry pathologist. Losses may result from concurrent disease or other conditions affecting drug intake which can contribute to the virulence of coccidiosis under field conditions.

Keep this and all drugs out of the reach of children.

FDA STATUS

No Form FDA 1900 required for use of this product.

STABILITY

AMPROL 128 is a 20% soluble powder that readily dissolves in water. AMPROL 128 is stable for three years at the time of manufacture.

Stock solutions for proportioners may be stored in a clean, closed labeled container for up to three days.

Certain coccidial strains have appeared that are not sensitive to amprolium. The use of an alternate strain sensitive anticoccidial agent is recommended in these cases.

To prepare 50 gallons of medicated water:

Dosage Level Mixing Directions

- 0.024% Dissolve 8 ounces of AMPROL 128 20% Soluble Powder in about five gallons of water in a 50-gallon medication barrel. Stir, then add water to the 50 gallon mark. *Stir thoroughly.*
- 0.012% Follow same directions as above but use 4 ounces of AMPROL 128 20% Soluble Powder.
- 0.006% Follow same directions as above but use 2 ounces of AMPROL 128 20% Soluble Powder.

Make drinking water fresh daily.

For automatic water proportioners that meter 1 fluid ounce of stock solution per gallon of drinking water:

Dosage Level AMPROL 128 20% Soluble Powder per gallon of stock solution

- 0.024% 2 bags (20 ounces) in one gallon
- 0.012% 1 bag (10 ounces) in one gallon
- 0.006% 1/2 bag (5 ounces) in one gallon

Stock solutions for proportioners may be stored in a clean, closed, labeled container for up to three days.
