Flash Point ........: 480 C
Extinguishing Media: Water, Carbon Dioxide, Dry Chemical, Foam.

Unusual Fire and Explosion Hazards ..: Severe dust explosion hazard. Toxic emissions may be given off in a fire. See Decomposition Products in Section 10. Stability and Reactivity.

Fire Fighting Instructions: Wear NIOSH/MSHA approved positive pressure, self contained breathing apparatus and full protective turn out gear. Evacuate personnel to an area upwind to avoid smoke and vapors. Use caution in approaching fire. Use water to keep fire exposed containers cool.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Spill Clean Up Procedures ........: Shut off the source of the spill or leak if it is safe to do so. Eliminate possible ignition sources. Scoop or shovel spilled material into a suitable labeled open head drum. Secure the drum cover and move the container to a safe holding area. Clean spill area thoroughly.

Treatment and Disposal ........: Dispose of in accordance with recommendations in Section 13 Disposal Considerations.
SECTION 6. ACCIDENTAL RELEASE MEASURES (Continued.)

Reporting Requirements ........: The United States Environmental Protection Agency (USEPA) has not established a Reportable Quantity (RQ) for releases of this material. In New Jersey, report all releases which are likely to endanger the public health, harm the environment or cause a complaint to the NJDEPE Hotline (1-609-292-5560) and to local officials. State and local regulations vary and may impose additional reporting requirements.

SECTION 7. HANDLING AND STORAGE

Storage Temperature
(min/max) ............: < 25 deg C
Shelf Life ............: 12 months
Special Sensitivity : Do not heat above 200 degrees C.
Handling & Storage
Precautions ...........: Do not generate dust or expose to ignition sources. Ground and bond all transfer equipment. Milling/mixing/drying should be performed in devices equipped with explosion relief or suppression systems or under inert conditions. Use with adequate ventilation. Avoid contact with eyes, skin and clothing. Avoid breathing dust. When handling, use proper personal protective equipment specified in section 8. Wash thoroughly after handling. Keep container tightly closed when not in use. Store in a cool, well ventilated area.

SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS
Ventilation ............: General room ventilation is adequate unless the process generates airborne dust or fume.

PERSONAL PROTECTION
Respirator Type(s) : Half Face, Nontoxic Dust/Mist Filter.
Conditions for Use : Under normal conditions of use, respiratory protection is not expected to be necessary. Respiratory protection is recommended under excessively dusty conditions. OSHA considers effective engineering controls to be the primary means to control worker exposure. Respiratory protection should not substitute for feasible engineering controls. Whenever respiratory protection is used, a complete respirator program should be developed in accordance with OSHA Subpart I (29CFR1910.134) requirements.
SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION (Continued. . )

Glove Materials .....: Any plastic or rubber glove.
Conditions for Use .: Gloves are recommended if there is a potential for skin contact.
Skin Protection ....: Use protective clothing (lab coats, disposable coveralls, etc.) in both production and laboratory areas.
Eye Protection .....: Safety Glasses Required, Safety Goggles Recommended.

OTHER CONTROL MEASURES

Additional
Protective Measures : Provide safety showers and eyewash stations in the work area. Prevent the accumulation of dust in the work area by thorough periodic cleaning of the area.
