

DIRECTIONS FOR USE

Add Pro-Way advanced whey alternative as a one-for-one substitution for dried whey in commercial feeds. Typical use levels range from 5-20 percent in starting and growing rations.

Pro-Way directly replaces the following nutrients from whey. Therefore, no changes in the levels of these commonly guaranteed nutrients are necessary.

ADVANTAGES

- Direct one-for-one alternative to expensive dried whey.
- 72% Biologically-active simple sugars which are naturally produced and used by animals.
- More easily digested by the immature intestine than products containing sucrose, or table sugar.
- Contains no sucrose.
- Spray-dried natural protein.
- Higher amino acid digestibility than dried whey.
- BSE Free- No mammalian protein sources, in compliance with FDA regulations 21 CFR 589.2000.

CAUTIONS

For animal use only.
Not for human consumption.
Store in a cool, dry place.
Keep out of reach of children.

PACKAGING

50 pound
(22.68 kg)
Multi-wall moisture resistant bags

INGREDIENTS

GUARANTEED ANALYSIS PER KILOGRAM

Crude protein.....	12%
Crude fat	0.90%
Crude fiber	none
Calcium	0.75%
Phosphorus.....	0.72%
Potassium.....	1.96%
Magnesium.....	0.13%
Sodium.....	0.94%
Lysine.....	0.90%

INGREDIENTS

Dextrose, plant protein products, dried whey, calcium stearate, l-lysine monohydrochloride, monopotassium phosphate, l-threonine, potassium chloride, monosodium phosphate, dl-methionine, potassium sulfate, magnesium sulfate, monocalcium phosphate, l-tryptophan, magnesium oxide, natural and artificial flavorings.
