Sure-Bond Plus®

Animal feed pellet binder

Ingredients:

Urea-formaldehyde condensation polymer

Applications:

The ideal weatherproofing and binding additive for animal feed in cubes, blocks, or pellets.

Dosage Recommendations:

Use 2 – 4 lbs. per ton of feed to be pelleted or when replacing other urea-formaldehyde binders, use at the same dose level. SURE-BOND PLUS®, being a low-inclusion pellet binder, should be added along with other micro ingredients.

As conditioning plays a very important role in pellet or cube quality, higher temperatures and low pressure steam provide excellent wetting durability.

Availability:

Stocked in local warehouses in 55 lb. bags, also available in "Super Sacks" or in bulk. The product is sold in bags and is stretch-wrapped and palletized for customer convenience.

Analysis

	Dry Basis	As Received	
Moisture By Vacuum Oven		3.89	%
Dry Matter		96.11	%
Protein, Crude	190.50	183.09	%
