

INDICATIONS

Inhibits microorganisms in animal drinking water systems.

DIRECTIONS FOR USE

Drinking Water:

To completely sanitize water add 2.5 L (2.5 Kg) of AquaGuard liquid into each 1,000 Liters (82 oz. per 256 gallons) of water.

INGREDIENTS

Propionic acid, ammonium hydroxide, acetic acid, phosphoric acid, benzoic acid, sorbic acid, methylparaben, propylparaben, and BHA.

CAUTIONS

For animal use only.
Not for use in humans.
Keep out of reach of children.

PACKAGING

20 Liters
400 lb drum

ADVANTAGES

- Synergistic blend of organic antimicrobials
- Not an antibiotic, protects with no drug residue withdrawal
- Safely kills Salmonella, E. Coli, and Clostridium in drinking water systems
- Highly concentrated and buffered for reduced corrosiveness
- Fast-acting molecules speed the uptake by contaminating organisms
- Effectively disrupts the internal metabolism of unwanted bacteria
- Surfactant activity with multiple active ingredients provide more complete coverage
