www.asp-inc.com

Specification Sheet

INDICATIONS

For use as a topical protective barrier on the skin of swine to shield from abrasion and guard against contamination that may cause infection.

ADVANTAGES

- Easy to spray, dries fast to form a flexible film bandage for abrasions, cuts and scrapes
- Covers and seals wound to maintain clean, moist healing environment
- Antibacterial and antifungal activity
- Deters tail biting
- Soothing analgesic action
- Highly visible
- Safe, non-toxic, 100% GRAS (21 CFR) food approved components
- No preslaughter withdrawal required
- Removal and cleanup with water

INGREDIENTS

Ethyl Alcohol	72.6%
(Topical microbiocidal alcohol and external analgesic)	
Sodium Propionate	0.5%
(Topical antifungal and antimicrobial)	

CAUTIONS

Not for human use
Keep out of reach of children

PACKAGING

1 Liter (33.8 oz) Bottles
12 Bottles per Case

DIRECTIONS FOR USE

Shake well before use.

For best results, clean and dry the wound and surrounding skin for good adhesion. Apply Oinkment with spray tip 6 inches from wound, spraying to completely cover the wound and overlap onto surrounding healthy skin.

Reapply every other day or as required to keep the wound sealed until satisfactory results are achieved.

STORAGE

For external use only
Store at room temperature
