**Jessica Seate, DVM**  
**Director of Veterinary Science**  
*November 12, 2021*

Animal Science Products, Inc. announces the appointment of Jessica Seate, DVM, as Director of Veterinary Science. Dr. Seate earned her Bachelor of Science degree in Animal Science from North Carolina State University where she graduated Valedictorian in the College of Agriculture and Life Sciences. She then traveled to Michigan State University to earn her Doctorate of Veterinary Medicine. Additionally, she completed the Executive Veterinary Program at the University of Illinois.

During her career, she has enjoyed the experience of providing veterinary services to one of the World's leading swine producers as well as technical veterinary service for two world-renowned Animal Health companies. In her new position as Director of Veterinary Science at ASP, she will develop and oversee research supporting further development of Vaccine Stabilization, Gel Application, Non-antibiotic Intervention products, and animal welfare products.

Culley Wilson, Director of Sales for ASP commented, "Animal Science Products, Inc. has long been the global leader in vaccine stabilization for poultry. We are excited to have Dr. Seate join our team as we adapt our innovative technologies to serve the swine industry. Dr. Seate's experience and expertise with oral vaccines will help accelerate our company and our products into the global swine market."

ASP Chief Scientist Ryan Izard added, "Dr. Seate's clinical background in mixed species veterinary practice, combined with her integrated swine health management and global vaccine experience, promises to make her an impactful resource providing ideal solutions to ASP animal health customers."

ASP is a global leader in vaccine stabilization, gel application and non-antibiotic intervention, offering vaccine stabilizers for water, spray, gel, and ocular delivery. Our newest product, Oinkment<sup>®</sup>, an animal welfare product, is a spray-on, flexi-film bandage providing effective wound care and infection control for swine.

Animal Science Products, Inc. is a family owned and operated business that was founded in 1985 to service all facets of the feed and food animal production industry. Currently, the company has sales throughout the U.S. and in over forty countries.
